

How to Convert your M203grip to an RM Rail Grip

A. What Is in Your Kit:

The RM Rail Clamp Module
Part Number 71G101

B. Convert:

1. Unscrew the M203grip Clamp Assembly from the handle of your M203grip (Figure 2). Secure the M203grip Clamp Assembly (Figure 3) for future use.

2. Put the Rail Grip Module through the Mandrel, making sure the Rail Clamp Module and the mandrel are lined up as shown in Figure 4, before screwing it into the handle.

3. Tighten by turning the handle clockwise.

Figure 3

Figure 4

C. Using the RM Rail Grip:

There is no need to slide and position this rail grip. Simply put the RM Rail Clamp where you want it and turn the handle until it tightens on to the rail. The RM Rail Grip attaches to any MIL-S-1913 (Picatinny style) rail. It has a ratcheting system that holds it anywhere on the rail.
