

# The RM Rail Grip with the Tactical Light Module Accessory Assembly Instructions

## 1. WHAT IS IN YOUR KIT:

1. RM Rail Grip  
Assembly  
and Handle

2. **Tactical Light Module** with the  
SureFire® Flashlight

3. SureFire® Lithium  
batteries

4. SureFire®  
Manual

Figure 5

**2. ASSEMBLY:** Unscrew the Clamp Assembly from the handle of your RM Rail Grip (Figure 5). Put the Clamp Assembly Screw through the Tactical Light Module and into the Handle (Figure 6). Make sure the light is aligned to the clamps as shown in the picture. Otherwise the clamps will not close when the handle is tightened.

Figure 6. While the Tactical Handle is pictured, the assembly instructions are the same if your handle is the long, Battery Handle.

Figure 7

**3. INSTALLING THE BATTERIES:** Unscrew the **FRONT** of the light without removing it from the mounting sleeve. Install the batteries as shown. Replace the lens assembly. **DO NOT OVER TIGHTEN. (Follow applicable laws and regulations for disposal of batteries.)**

Figure 8

**4. OPERATION:** The flashlight is activated by pushing the button at the rear of the flashlight. The flashlight will only light while you are pushing on the button. This is to prevent accidental illumination during tactical operations.

While you can remove the flashlight from the sleeve, it is NOT recommended. **DO NOT ATTEMPT TO REMOVE THE SLEEVE FROM THE GRIP.**

**DO NOT  
REMOVE  
SCREWS**
